

1. Explain the Managerial Grid Theory of the Behavioral Approach. Draw a neat and labelled diagram.

MANAGERIAL GRID THEORY BY BLAKE AND MOUTON

“Managerial Grid” style of leadership was developed by Robert Blake and Jane Mouton (1969). The managerial grid model explains concern of a manager for production and people. Blake and Mouton’s model helps to measure a manager’s relative concern for people and task and reflects bi-directional nature of leadership. The managerial grid identifies a range of management behaviour based on the various ways that the task oriented and employee oriented styles, which have been explained as a continuum on a scale of 1 to 9.

Concern for people includes such elements as degree of personal commitment to-wards goal achievement, maintenance of self-esteem of people, assigning task based on trust, provision of good working conditions and maintenance of good inter-personal relationship.

As far as the leadership style that displays **concern for production** includes elements like output of the workers, work efficiency, quality of policy decisions, various processes and procedures that are followed during the production line. It also includes creativity, research and development undertaken, quality of product produced and last but not the least services provided by the staff.

1. Impoverished Management 1:1

Under this style (as shown in the figure-left bottom corner,) is referred to as impoverished management or Laissez-faire type of management. Managers do not involve themselves with the work or people, they only mark time and have abandoned their job. They act as messenger to pass information from superiors to subordinates. They neither display any concern for people nor for the production. They display minimum involvement in the job they are assigned to. This amounts to exertion of minimum efforts on the part of leader to get required work done is appropriate to sustain organizational membership.

2. Team Management 9:9

At the extreme opposite is team management style of leadership where managers mesh interest of people and production needs in the balanced manner. Their involvement is total. They are real team leaders who have full knowledge, skill and aptitude for job and also concern for the welfare of workers. Blake and Mouton argue strongly that style 9:9 is the most effective management style. They believe, this leadership approach will, in all situations, result in improved performance, low absenteeism, and turnover and high job Satisfaction.

3. Country Club Management 1:9

Leaders who follow this style of leadership display very high concern for people and very little interest for production. They create a very relaxed and friendly environment. There are no organizational goals and exist very loose style of functioning. The working environment is workers welfare oriented.

4. Autocratic-task Oriented 9:1

This leadership style concentrates on setting of organizational goals, development of effective operations systems, utilization of organizational resources, achievement of objectives and stress on quality of work and production. The leader functions in an autocratic way with no or very little concern for people.

5. Middle of the Road Management 5:5

Managers have both concern for people and production. They set moderate production goals and achieve them. They have equal concern for people and work. They achieve reasonably satisfactory results in maintain high morale of workers and meet production requirements. The managerial grid is widely used model for training and development of managers. The model cannot determine a particular style of a leader because leadership is influenced by personality traits, skills, attitude of the leader and the followers. Apart from the above situational factors in work environment and the organizational culture affects the leadership style to a great extent.

2. Explain the Tannenbaum & Schmidt Model of Leadership.

The Tannenbaum and Schmidt Continuum is a simple model of leadership theory which shows the relationship between the level of freedom that a manager chooses to give to a team, and the level of authority used by the manager. As the team's freedom is increased, so the manager's authority decreases. This is a positive way for both teams and managers to develop.

In short, the Tannenbaum-Schmidt Continuum shows where a manager's approach lies on a continuum, running from the manager exerting rigid authority at one extreme, through to the team having full freedom to act at the other.

Tannenbaum & Schmidt concentrated more on delegation & freedom in decision making to subordinates and thereby on the team development. As the team's freedom increases, the manager's authority decreases. This is a positive way for both teams and managers to develop.

Tannenbaum & Schmidt defined 7 levels of delegated freedom which moves from manager-oriented to subordinate-oriented.

1. Manager takes decision and announces it – only manager plays the decision-making role; no team involvement.
2. Manager decides and then “Sells” his decision to the team – no change in decision; but team may raise some concerns.
3. Manager presents decision with background ideas for the decision and invite questions – team knows what options manager considered for his decision; more team involvement.
4. Manager suggests provisional decision & invites discussion regarding the decision – team can have a say on manager's decision; it can be changed based on discussion
5. Manager presents the problem or situation, get suggestions, then decides – team is free to come up with options; manager decides on those options.
6. Manager explains the situation or problem, defines the parameters and asks team to decide on the solution – manager delegated whole thing to the team; but still manager is accountable for the outcome.
7. Manager allows team to develop options and decide on the action, within the manager's received limit – complete freedom level; team does all the work almost as what the manager does at level 1.

3. Explain the Situational Leadership Theory by Hersey & Blanchard.

One of the major contingency approach to leadership is Paul Hersey and Kenneth H. Blanchard's Situational Leadership model. The model emphasis on the following points:

1. The most effective leadership style varies with “**readiness**” of employees. The readiness is defined as the desire for achievement, willingness to accept responsibility, and task related skill, ability and experience.

2. **Goals and knowledge of followers:** To understand the model, it is necessary to understand task and relationship behaviour.

3. **Task Behaviour:** Task behaviour is defined as “the extent to which the leader engages in spelling out the duties and responsibilities of an individual and group. These behaviours telling people what to do, how to do it, when to do it, where to do it, and who is to do it.” Task behaviour is characterized by one-way communication from leader to follower. The leader is not concerned with the feeling of follower but he is concerned as to how to help the follower to achieve the set goal.

4. **Relationship Behaviour:** Relationship behaviour is defined as “the extent to which the leader engages in two way or multi way communications, the behaviours include listening, facilitating and supportive behaviour.”

- **Style-S1:** This relationship style is characterized by above average amounts of Task behaviour and below average amount of relationship behaviour.
- **Style-S2:** This relationship style is characterized by above average amount of both task and relationship behaviour.
- **Style-S3:** This style is characterized by above average amount of relationship behaviour and below average amount of task behaviour.
- **Style-S4:** This style is characterized by below average amount of both relationship and task behaviour.

In the initial stage of readiness (S1 situation) **a leader is required to guide the follower** about the task. In this situation leader shows least concern for their welfare, and personal relationship. As the situation improves (S2 situation) the leader's trust in his employee increases as the leader becomes part of the group and wishes to encourage them to accomplish the task. In this situation the employees have to work within the framework of the task structure hence the leader has to maintain an highest degree of commitment to task relationship. In S3 situation the employees develop high degree of work ability and achievement orientation (motivation) begin to surface as they seek greater responsibility hence very close relationship is required to be maintained. In S4 situation follower no longer need direction as they become more confident and experienced.

4. Mention the core traits for being an effective and successful leader.

CORE TRAITS IDENTIFIED FOR EFFECTIVE AND SUCCESSFUL LEADERS ARE:

- **ACHIEVEMENT DRIVE:** High level of effort, high levels of ambition, energy and initiative
- **LEADERSHIP MOTIVATION:** an intense desire to lead others to reach shared goals
- **HONESTY AND INTEGRITY:** trustworthy, reliable, and open
- **SELF-CONFIDENCE:** Belief in one's self, ideas, and ability

- **COGNITIVE ABILITY:** Capable of exercising good judgment, strong analytical abilities, and conceptually skilled
- **KNOWLEDGE OF BUSINESS:** Knowledge of industry and other technical matters
- **EMOTIONAL MATURITY:** well adjusted, does not suffer from severe psychological disorders.
- **OTHERS:** charisma, beauty, handsome, rich, educated in foreign, creativity and flexibility

5. What do you mean by a Charismatic Leader?

Charismatic leaders are driven by their convictions and commitment to their cause. Charismatic leaders also are sometimes called transformational leaders because they share multiple similarities. Their main difference is focus and audience. Charismatic leaders often try to make the status quo better.

6. Differentiate between Self and Organizational Culture.

Self	Organizational Culture
Refers to an individual's identity, values, beliefs, and personality.	Refers to the shared values, beliefs, norms, and practices within an organization.
Shapes personal behavior and decision-making.	Influences how employees interact and perform within the organization.
Developed through personal experiences and upbringing.	Developed through organizational history, leadership, and practices.

7. What do you mean by Workplace Spirituality?

Definition:

Workplace spirituality refers to organizational practices that promote meaningful work, a sense of community, and alignment with core personal values.

Benefits:

- Higher job satisfaction
- Ethical decision-making
- Lower turnover and stress

Example:

- **Zappos** using a **Holacracy system** (no traditional managers, self-management approach)

8. What do you mean by Group Cohesiveness?

- It refers to the extent of linking each member has towards others and how far everyone wants to remain as a member of group.
- Group cohesiveness can be affected by such factors as interaction, threat, cooperation, similarity attitude, and size.

9. How to create Positive Work Culture?

To create a **positive work culture**, an organization should focus on:

- **Open communication** and transparency
- **Employee recognition** and appreciation
- **Trust and respect** among team members
- **Supportive leadership**
- **Work-life balance** and wellness initiatives

These elements foster motivation, collaboration, and employee satisfaction.

10. Differentiate between Team and Group?

Group	Team
A group is a collection of individuals who interact to achieve individual goals or a common interest.	A team is a group of individuals with complementary skills working towards a shared and specific goal.
Members may or may not share accountability.	Members share responsibility and accountability for outcomes.
Interaction may not always lead to synergy.	Teams aim for synergy—better outcomes together than individually.
Structure is more informal.	Structure is often more defined, with clear roles and leadership.
